- Digestion, Absorption, and Transport of Nutrients

Chapter 3 Understanding Nutritional Guidelines and Labeling

- A Healthy Diet
- Dietary Reference Intakes
- *Dietary Guidelines for Americans 2005*
- MyPyramid
- Nutrition Labeling—Implementation and Interpretation

Chapter 4 Carbohydrates

- Carbohydrate Basics
- Simple Carbohydrates: The Sugars
- Complex Carbohydrates: Polysaccharides
- Dietary Fiber
- Digestion, Absorption, and Metabolism of Carbohydrates
- Carbohydrates and Health Problems

Chapter 5 Proteins

- Protein Basics
- Proteins and Nutrition
- Nutritional Properties of Proteins
- Protein Changes during Cooking
- Excessive and Insufficient Protein in the Diet
- Dietary Requirements for Protein

Chapter 6 Lipids

- Lipids: Structure and Function
- The Role of Lipids in the Body
- Cooking with Fats and Oils
- Dietary Intakes of Lipids
- Lipid Digestion and Absorption
- Lipids and Health

Chapter 7 Vitamins, Minerals, and Water

- What Are Vitamins and Minerals?
- Vitamins in the Diet
- Minerals in the Diet
- Retaining Vitamins and Minerals When Cooking
- Supplementation of Vitamins and Minerals
- Water in the Diet

Chapter 8 Food with Nutritional Appeal

- Growing Nutritious Food
- Harvesting, Transporting, and Processing Nutritious Food
- Receiving, Storing, and Preparing Nutritious Food
- Cooking Nutritious Food

Chapter 9 Cooking and Eating More Healthfully

- How People Taste Food
- Cooking More Healthfully
- Adapting Recipes for Good Nutrition

Chapter 10 Eating in the United States

- A Healthy Diet
- The American Diet
- Special Diets
- Popular Fad Diets
- Herbs and Herbal Supplements
- Relationship of Diet and Exercise
- Weight-Loss Diets
- Health Risks of American Diets
- Food Additives—Their Role and Impact
- Allergens in Food Items
